Dear members

Subject: **INTRODUCING TAX RETURNS IN PNG AND SCHOOL FEE REBATE MAKE IT PUBLIC**

I am really please to say thank you to Ms Sawong for creating the page on face book called the PNG Tax Review. The purpose of the fb account is basically to invite public to comments and give suggestions about how our tax system should operate in PNG to benefit us (Papua New Guineans).

As a citizenship of the country and living in Australia and working I have seen how Australian Tax office (ATO) goes about doing it's tax system. One of the tax systems is to allow individuals and companies to apply for Tax returns at the end of each financial year. My question to you panels is that is that; is it possible for PNG government to introduces tax returns for public and business in PNG? I don't see and reason why PNG can't be able to fund these tax returns policies in PNG.

During my time in PNG, used to send all my kids to private schools and couple of times did applied for school fee rebate and got reimbursed for it. Many PNGeans would like their children to have a descent education and prepare sending their children to private school. Majority of the parents have neither idea nor does aware of this school fee tax rebate. There are no enough awareness carried out by IRC through it sub branches throughout the country. Therefore public really needs to know this school fee tax rebate exist and how to apply to the commission to have their fund claim future.

I'll be pleased to receive any feed backs from the panels regarding their decisions over the subject mention above.

Yours faithfully

*Clement yang*
